

PROJECT DEVELOPMENT PHASE: MODEL PERFORMANCE TEST

SWTID-2026-8437

Salesforce Platform Alignment – Auto Ticket Classification / Flow Design

DATE	TEAM ID	PROJECT NAME	MAXIMUM MARKS
1.10.2026	SWTID-2026-8437	Salesforce	[Evaluation Pending]

Salesforce Template Alignment Note: The standardized project development template uses parameters for Model Summary, Accuracy, and Confidence Score (YOLO models). Because this Salesforce project focuses on access-control automation and ticket classification using script-controlled security rules (ACL), standard computer-vision metrics like Confidence Score are designated as **Not Applicable (N/A)**. Performance is evaluated through record visibility authorization testing.

1. MODEL PERFORMANCE TESTING PARAMETERS

S.No	Parameter	Values & Technical Description	Screenshot / Evidence
1	Model Summary	Salesforce access-control automation for restricting record visibility based on the Branch field. The solution utilizes a script-controlled ACL / Flow Design rule to evaluate the logged-in user's branch against the target record's Branch value. EEE users are permitted to view records where Branch = EEE, non-EEE users are denied, and Administrators retain full access.	[Insert Salesforce ACL / Flow Configuration Screenshot]
2	Accuracy	Functional / Authorization Accuracy: • EEE User + EEE Record → Access Allowed • Non-EEE User + EEE Record → Access Denied • Administrator → Full Access Target Planned Accuracy: 100% for defined acceptance scenarios upon execution.	[Insert Access Validation / Test-Result Screenshots]
3	Confidence Score (Only YOLO Projects)	Not Applicable (N/A) This project is a Salesforce access-control automation project and does not use YOLO object detection models, image classification, or confidence score metrics.	N/A

2. PROJECT-SPECIFIC ACCEPTANCE CRITERIA

Test Scenario	Expected Result	Actual Result	Status
EEE user accesses an EEE record	Record is visible (ALLOW)	To be filled	☐
Non-EEE user accesses an EEE record	Record is restricted (DENY)	To be filled	☐
Administrator accesses an EEE record	Record is visible (ALLOW)	To be filled	☐
Administrator accesses other permitted records	Full access retained (ALLOW)	To be filled	☐
Record has an unexpected / empty Branch value	Follow defined secure default rule	To be filled	☐

3. EVIDENCE / SCREENSHOT CHECKLIST

☐ ACL / Flow configuration showing the object/table, operation, and script condition
