

UAT EXECUTION & REPORT SUMMARY

SWTID-2026-8437

Script-Controlled ACL – Restrict Record Access Based on Field Value

DATE	TEAM ID	TARGET MODULE	EXECUTION TYPE
1.10.2026	SWTID-2026-8437	Auto Ticket Classification	Script-Controlled ACL

1. PURPOSE & EXECUTIVE SUMMARY

This report summarizes the User Acceptance Testing (UAT) coverage and execution status for the script-controlled Access Control List (ACL) flow design. The focus of testing is strict authorization correctness: ensuring **EEE users** can view records matching Branch = EEE, **non-EEE users** are restricted from viewing protected EEE records, and **Administrators** retain unrestricted systemic access.

2. TEST COVERAGE & EXECUTION MATRIX

Area	Test Cases	Scope / Validation Objective	Result Status
Configuration Validation	TC-001	Verify ACL rule condition, script structure, and field mapping for Branch field.	To be filled
Positive Authorization	TC-002, TC-004, TC-005	Confirm EEE user can view EEE record, and Administrator has full access across all branch records.	To be filled
Negative Authorization	TC-003, TC-008	Confirm non-EEE user is restricted from viewing protected EEE records and report exports.	To be filled
Edge Cases	TC-006, TC-007, TC-009	Validate handling of empty/null Branch values, unexpected user roles, and bulk ticket lists.	To be filled
Final Acceptance	TC-010	End-to-end regression validation and performance check under automated ticket classification.	To be filled

3. DEFECT SUMMARY

Severity Level	Open Defects	Closed Defects	Total Logged
Critical (P1)	0 / To be filled	To be filled	To be filled
High (P2)	To be filled	To be filled	To be filled
Medium (P3)	To be filled	To be filled	To be filled
Low (P4)	To be filled	To be filled	To be filled

4. RELEASE READINESS STATEMENT

Release readiness is determined based on completed UAT evidence, actual test scenario execution logs, and resolution of all Critical/High severity defects. Final deployment authorization is granted upon sign-off by designated stakeholders below.
